Machine Learning, Deep Learning, AI Algorithms

EDUCATION

B.Sc. Computer Engineering

Boğaziçi University
Istanbul, Turkey · 1999 – 2006
Thesis: HL7-based healthcare database design

LANGUAGES

Turkish — Fluent
Greek — Native
English — Professional

PERSONAL DETAILS

Date of Birth: 15 Feb 1982

Nationality: Greek

Marital Status: Married

Driving Licence: Category B

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 15+ years of experience designing and delivering web applications across the tourism, finance, and e-commerce sectors. Skilled in leading development teams, architecting scalable platforms, and integrating complex back-end systems, with a continued focus on Machine Learning and Deep Learning.

PROFESSIONAL EXPERIENCE

Booklogic — Istanbul, Turkey Feb 2014 – Present

Team Lead & Senior Full Stack Developer

- Lead the development team building BookLogic's hotel technology suite — an online booking engine, channel manager, PMS, and reputation management platform used by hotels.
- Design and develop backend services in PHP and MySQL, powering real-time room availability, rates, and reservations across multiple sales channels.
- Build and maintain the channel manager that synchronizes inventory and pricing with major OTAs (Booking.com, Expedia, etc.), reducing overbookings and manual workload for hotels.
- Develop responsive front-end booking flows with JavaScript, HTML, and CSS, focused on conversion and guest experience.
- Own sprint planning, code reviews, and release delivery as team lead.

WebLogic — Alexandroupolis, Greece Jun 2008 – Aug 2013

Web & SQL Developer

- Developed a reservation platform for tour operators using ColdFusion and Microsoft SQL Server.
- Built and managed booking workflows across a range of tourism services — hotels, transfers, excursions, car rentals, and charters.
- Designed and maintained the platform's database and business logic on SQL Server.

SELECTED PROJECTS

E-Commerce, ERP & Marketplace Integration Platform

Shopify · OpenCart · WooCommerce · Trendyol · Amazon · Hepsiburada

- Designed and built a platform connecting e-commerce stores (Shopify, OpenCart, WooCommerce) with ERP systems, automating the flow of orders, stock, and product data.
- Integrated leading marketplaces (Trendyol, Amazon, Hepsiburada) to centralize multi-channel sales and inventory management.

End-to-End Logistics Platform for E-Commerce

- Developed a complete logistics solution for modern businesses and online stores, streamlining shipping, fulfillment, and delivery operations across the order lifecycle.

Restaurant POS & Inventory Management System

- Built a point-of-sale (POS) and inventory management system for restaurants, covering order processing, real-time stock tracking, and operational reporting.
